HARNESS THE POWER OF YALE 360° LIFTING TO IMPROVE YOUR SAFETY AND PRODUCTIVITY

Lifting and positioning applications are not always straightforward – literally. Sometimes you may need to lift a product or material that is below you. Other times, you may need to move a heavy load from one area to another over obstructions or through small openings. The complexity of these applications can pose a challenge for standard lever tools or hand chain hoists and may even cause operators to cut corners with safety and ergonomics to get the job done.

That's where the power of 360° lifting comes into play.

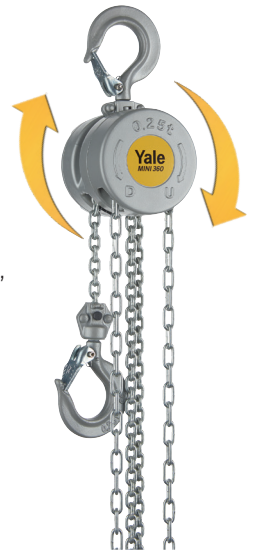

Columbus McKinnon offers a selection of hand chain hoists and lever tools designed for 360° lifting that provide many benefits you may not be aware of. Designed for intelligent motion, these products help customers work smarter, stay safer, and be more productive.

YALE MINI 360

SMALLEST HAND CHAIN HOIST

Capacities: 250 - 500 KG

The Yale *MINI 360* is the **smallest** hand chain hoist on the market with full **360° rotation**, providing flexibility and versatility for narrow or challenging applications. Small and lightweight, the Yale *MINI 360* is ideal for multi-angle applications, allowing the operator to lift from virtually any position. This hoist is essential for service technicians, construction workers or any low-capacity lift.

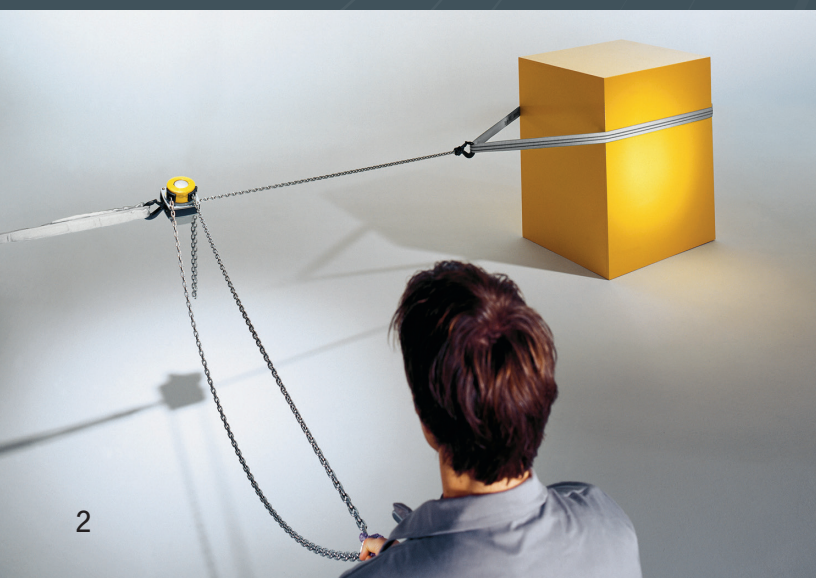

YALE LIFT 360

HOOK-MOUNTED HAND CHAIN HOIST

Capacities: 500 - 20000 KG

Hook-mounted Yale *lift 360* hoists are ideal for applications where the hoist will remain in a fixed position or there is already a trolley in place to attach the hoist. The **360° rotating hand chain guide** allows the operator to work from virtually **any position**, in confined spaces or above the load. These units require minimal maintenance and are available with zinc-plated load and hand chain. A variety of options are available, including latchlok-style load hooks and chain containers.

YALEERGO 360 WITH RETRACTABLE CRANK

Capacities: 1500 - 9000 KG

Redefining lever-operated hoists, the YaleERGO 360 features the **revolutionary Sidewinder™** lever handle that allows for safe and efficient operation. Ergonomically designed for increased safety, the patented YaleERGO 360 lets the operator to **work up to 12 times faster** and with as much as **30% less pull force** than with conventional ratchet lever tools.

The 360° rotating lever safely keeps the operator's hand and body aligned with the load chain while the revolving handle folds down into position on either side of the lever, allowing for easy and swift operation from any angle.

YALEERGO 360 UT WITH RETRACTABLE CRANK & SAFETY GEAR

Capacities: 1500 - 9000 KG

The YaleERGO 360 UT is now also redefining the world of hoists for overhead line construction. The automatically acting, **patented safety gear**, once more increases the safety of use. It **prevents a sudden load drop** works when a certain speed is exceeded during use as well as during inactive phases - especially when the device is tensioned for a long period of time. The ergonomic and safety enhancing design of the device and the revolutionary, patented hand lever enable efficient work at any angle, for lifting and pulling applications

INNOVATIVE DESIGN FOR SAFER, MORE PRODUCTIVE AND ERGONOMIC WORK

With over **20 patents** in the field of manual hoists, we have been **setting new standards** on the market for decades!

Hoist design allows the operator to work in a **safe and ergonomic position**.

Rotating hand chain guide or crank handle enables **smooth 360° operation**.

The 360° design **increases productivity** and **reduces the risk of injury**.

DISCOVER THE YALELIFT FAMILY

The Yalelift 360 models are unique and intelligently designed for a variety of applications. In addition to the hook-mounted version, you have the choice of versions with integrated push or geared trolley which can be mounted on cranes or girders. The low-headroom LH models are special designed for use in areas with low ceilings or limited space.

All models are available in an explosion proof version.
